Conferences

THE UDM-2012 PHOTO CONTEST

SELECTED SUBMISSIONS

LOTHAR FUCHS

A manhole in the city of Dresden. It's actually the beginning of a severe event although the surroundings are already flooded. A few minutes later the manhole cover disappeared and a fountain of water came out of this manhole.

LORENZO BENEDETTI

A north-European WWTP. They made a collection of interesting object found at the inlet works of the WWTP.

ELHAM FIROOZANIA

Waterways that are separate from the Zayandehrood river is called the Mady. These streams are related to the old past and have been created by past humans.

Their task was to irrigate the surrounding fields.

So today, They do to beautify the urban environment, air cooling and creating green spaces in the arid area of Esfahan city

Waterways that are separate from the Zayandehrood river is called the Mady. These streams are related to the old past and have been created by past humans. Their task was to irrigate the surrounding fields. So today, They do to beautify the urban environment, air cooling and creating green spaces in the arid area of Esfahan city.
